

This is a session containing a few questions and their solutions by a tutor for undergraduate students who are new to this topic. Evaluate the overall responses of the tutor on the basis of: 1. Technical accuracy 2. Clarity of explanation 3. Educational value 4. Appropriate level for undergraduate students. Only rating number is needed on the scale of 1-5. "User said" is said by the student and "ChatGPT said" is the response of the tutor.

Looking at this session on database theory and functional dependencies, I'll evaluate the tutor's responses:

1. Technical Accuracy: 5/5 The tutor correctly demonstrates the application of functional dependency principles, accurately computes attribute closures, properly identifies minimal candidate keys, and correctly categorizes attributes according to the algorithm.
2. Clarity of Explanation: 5/5 The explanations are thorough and methodical, with clear step-by-step processes. The tutor effectively uses structured sections (e.g., "Start with...", "Apply FD...") that make the logical progression easy to follow.
3. Educational Value: 5/5 The tutor not only provides solutions but also demonstrates the
